Fluorimetric Immunoassay Analyzer

*COVID-19 Ag, cTnI, and NT-proBNP parameters are expected to be launched soon

- Maintenance Free
- Fast, Safe & Reliable Results
- Easy to Use & Simple Operation

Features & Benefits

- All-in-one cartridge contains all reagents
- Constant temperature control & automated pipetting
- Small sample volume (25 μ L)
- Fast test results (<15 minutes)
- Highly sensitive TRF (Time-Resolved Fluorescence) applied
- Various sample types available (Arterial and capillary whole blood, plasma, serum)
- No hematocrit bias due to centrifugation
- User friendly interface
- Provides 7-inch capacitive touch color LCD
- Convenient sample collecting
- LIS/HIS bidirectional communication
- External battery
- Internal printer
- Data backup using USB drive
- Able to detect both IgM and IgG at the same time (2-in-1 cartridge)
- Compact, fully automated POCT analyzer
- Battery-powered for use in resource-limited environment
