

ISI Information

To satisfy the need to have the ISI readily available when attendees enter the booth, there are two options within the virtual platform.

Option #1

Including the ISI in the description in the side panel before entering the booth. This text box allows for 265 words. Please see the image below of where this description box is highlighted in yellow.

Option #2

We can create custom content areas within the booth to display the ISI text or image. These can be clickable to the larger version of the text or to a weblink that also displays the ISI. Please see the examples below for the small, medium, and large booth.
